 **TRIPLE ACTION**
PROTECTS, DISINFECTS & PURIFIES

www.graphenstone.com

Our laboratory, and especially the R&D team, has worked with great effort and dedication in the development of a primer that complements and enhances the antibacterial action of our product GrafClean Ag+. The result is a **Triple Action KIT** - that **Protects, Disinfects and Purifies**.

The new formula developed by Graphenstone and which has resulted in our product **Primer Plus**, **eliminates COVID** thanks to its $Ph \geq 13$. This information is from the scientific study carried out by the prestigious French laboratory Sanofi Pasteur, which states that at $Ph 13 - 13.5$ the SARS CoV virus disappears **after 24 hours**.

With this KIT, Graphenstone presents to the market the best ecological alternative for completely healthy spaces.

 **INHIBITS
MICROORGANISMS**

 **IMPROVES
AIR QUALITY**

 **FOR BETTER
CLEANING**

•**Primer Plus:** ecological, natural and odourless disinfectant solution that works in wet film, **eliminating microorganisms** from interior and exterior surfaces.

The great disinfecting properties are due to the high content of calcium hydroxide and its **Ph $\geq$ 13**. It is important to highlight that it is a NON toxic product, without chemicals or solvents. It also **absorbs CO₂**.

To guarantee the continuity of the Primer Plus disinfectant activity, it must be coated with GrafClean Ag+ after 24 hours and within a maximum of 7 days.

•**GrafClean Ag+:** thanks to its formula with **Silver Ion** (Ag+), it inhibits and prevents the **growth of microorganisms** of any kind (bacteria, viruses, fungi and protozoa) on the dry surface, even after repeated cleaning cycles. In this way, the **antimicrobial** and **virucidal** effect is guaranteed.

Like Primer Plus, it is a NON-toxic product, free of chemicals and solvents and highly breathable.

You will find this video very useful to understand the operation and disinfection power of the KIT

TESTS AND CERTIFICATIONS

1. Action of the Primer Plus against COVID (document annexed)

-COVID: Scientific test carried out by the prestigious French laboratory Sanofi Pasteur

The study shows that at Ph13 - 13.5, the SARS CoV virus disappears after 24 hours.

<https://journals.sagepub.com/doi/pdf/10.1177/153567600701200206>

Our Primer Plus, having a $\text{Ph} \geq 13$, succeeds in eliminating the COVID within 24 hours of application. The product acts in wet film.

2. GrafClean Ag+ certificates (documents annexed)

-Inhibition activity against COVID of the Silver ion contained in GrafClean Ag+

Test based on the standard UNE-EN 14476:2014 + A1:2015 that verifies the inhibitory action against the COVID of the silver ion and its durability over time.

-Antimicrobial action:

Test that verifies the antimicrobial action of GrafClean AG+ paint.
